**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election of Species 1, Group 2, claims 41-50, 52-57 and 59-61 in the reply filed on 05/18/2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1-40, 51 and 58 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim.

### ***Claim Objections***

2. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 51-59 have been renumbered 53-61.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3731

4. Claims 41-50, 52-57 and 59-61 are rejected under 35 U.S.C. 102(e) as being anticipated by Levinson et al (6,277,139).

Levinson et al disclose in figures 1, 8a-8b, an embolic filter device to capture embolic debris in a vessel having the limitations as recited in claims 41, 47, 52-53, 56 and 60-61, including: a guide wire (12), an expandable filter assembly (10) mounted near the distal end of the guide wire, the filter assembly includes a self-expanding cage (20) having a circumferential member (6), and the circumferential member includes a plurality of bending regions (22, 24), where a proximal strut (21) attaches to the circumferential member, and where a distal strut (27) is coupled to the circumferential member, and a filter element (32) attached to the expandable cage (20), and where each connecting member is attached at a bending region (22) on the circumferential member.

Regarding claims 42-43 and 57, Levinson et al disclose the proximal strut has one end rotatably mounted to the guide wire (12); and where the struts (21, 27) are attached to the circumferential member at bending regions (22, 24).

Regarding claims 44, 46, 48-49, 54 and 59, Levinson et al disclose the filter device further includes a plurality of struts (21, 23, 25) attached to bending regions (22, 24) located on the circumferential member.

Regarding claims 45 and 50, Levinson et al disclose the filter device further includes a plurality of distal struts (figs. 8a, elements 25, 27) attached to bending regions (22, 24) located on the circumferential member.

Art Unit: 3731

Regarding claim 55, Levinson et al disclose the connecting strut is made from a different material than the proximal strut and distal strut. (see col. 10, lines 60-67 and col. 11, lines 1-5).

**Conclusion**

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
